

Having thus described and illustrated my new variety of grapevine, what I claim as new and desire to be secured by Plant Letters Patent is:

1. A new and distinct variety of grapevine substantially as illustrated and described which is somewhat remotely similar to the "Emperor", but from which it is distinguished by producing seedless fruit of larger size having a dark purple skin coloration and superior flavor and which are mature for commercial harvesting and shipment in a normal growing season approximately October 1 to October 15 in the San Joaquin Valley of central California.

ANGEL A. GARGIULO
